

CL 160 Outlet Bowl

Versatile Bowl Design

RwpClearflow CL 160 outlet bowl incorporates a 160mm spigot as part of a multi-purpose but simple bowl design. Coupled with the RwpClearflow CL 160 outlet clamping ring, the bowl can be clamped to any range of roof surface or gutter lining & can be easily adapted to become compatible where outlet welding or a mechanical fixing is Specified.

Secure pipe Connection

The RwpClearflow CL 160 Outlet bowl design also includes an anti-slip ring built into the spigot. This rib is formed as part of the spigot & positioned to give additional purchase within the connecting band seal once tight.

Material Options

The RWPClearflow CL160 outlet bowl is available in the following materials:

- Stainless Steel Grade 304
- Aluminium
