Multi-Purpose Design

RwpClearflow CL 110 (Straight Neck) Outlet is a 110mm multi-purpose clamp ring Gravity rainwater outlet. This outlet can be clamped to any range of roof surface or gutter lining & can be easily adapted to become compatible where outlet welding or a mechanical fixing is Specified.

Performance

RwpClearflow CL 110 (Straight Neck) has been tested by CRM rainwater to take up to a maximum gravity flow of 10.7 l/s during peak storm conditions.

Material

The RWPclearflow CL110 (Straight Neck) Primary outlet is available in the following materials:

- Stainless Steel 304
- Aluminium

Installation.

Outlets are installed in one of two ways:

Free issue to site.

The main contractor should arrange for a patch of membrane 500mm x 500mm to be issued to RwpClearflow offices.

Free issue to the gutter supplier for off-site fixing into the gutters.

The outlets are made up loosely and issued to the gutter supplier who fixes them to the gutter under their factory conditions.
