

CL 75-110 Baffle Plate

Unique Baffle Plate Design

RwpClearflow CL 75-110 Baffle Plate is a moulded HDPE single piece component. The baffle plate provides excellent Siphonic performance by effectively preventing the formation of a vortex within the pipework below. The RwpClearflow CL75-110 Baffle Plate screws directly to the connectors welded to the specified clamp ring configuration (Primary & Secondary) & is compatible with both the CL75 & CL110 outlets. It can also be connected directly to an adapted RwpClearflow CL75 or CL110 outlet bowl where outlet welding or a mechanical fixing is Specified.

Simplified Maintenance

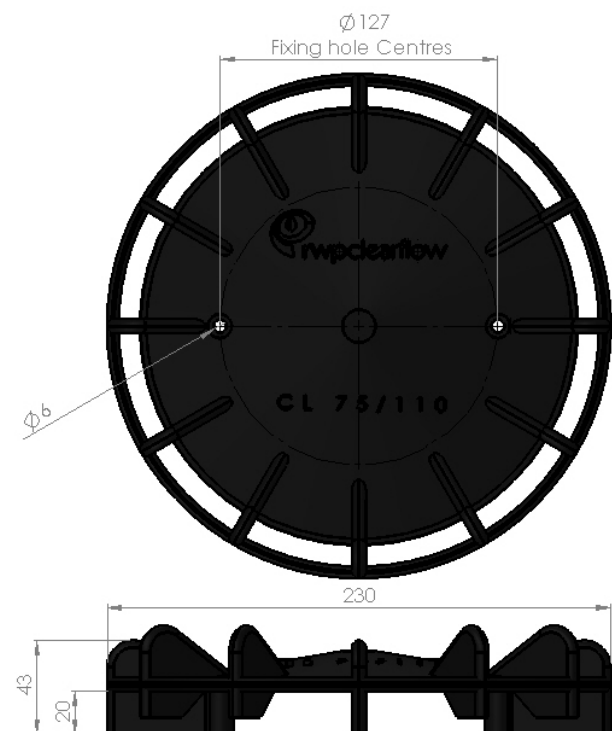

Due to its simple single piece design the RwpClearflow CL75-110 Baffle Plate is easily removed & refitted as part of any roof maintenance process. Its robust structure & Keeping the amount of small parts to a minimum helps to avoid damage & loss of parts on site which ensures this component stands out from any of its counterparts.

Material

The RWPclearflow CL75 Baffle Plate is available in the following materials:

- HDPE

Critical dimensions:

Please refer to RwpClearflow Outlet Assembly drawing A -001 for additional dimensional data.
